Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-3, in Paper No. 6 is acknowledged.

Claims 4-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regards to claim 1, the limitation "overlapping widths between the gate electrode and the source and drain electrode" renders the claim indefinite. It is unclear what is meant by the limitation "overlapping width", and how this width can be "between" the gate electrode and the source and drain electrodes. Note claim 3 has similar problems.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. (US Pat. 6,587,160, hereinafter Lee).

In regards to claims 1 and 3, as best the examiner can ascertain the claimed invention, Figure 19 of Lee discloses a substrate; a plurality of thin film transistors each including a gate electrode 101, a source electrode (115,116,117), and a drain electrode (125,126,127); a gate line 100 electrically connected with the gate electrode; a data line 110 electrically connected with the source electrode; and a pixel electrode 301 electrically connecting with the drain electrode. Figure 19 of Lee discloses the source/drain electrodes for the three transistors have three different widths (DW1, DW2, and DW3). The source/drain electrodes overlap the gate electrode, the overlapping portion has a width, and that width is different for each transistor. Therefore, it is considered that Figure 19 of Lee discloses overlapping widths between the gate electrode and the source and drain electrodes vary in accordance with a position of a respective one of the thin film transistors.

In regards to claim 2, Lee discloses a distance between the source electrode and the drain electrode is constant (column 11, lines 4-6).
